EXPERIENCE

MICROVERSE, *Remote*
Technical support Engineer, December, 2021– Present
- Providing quality and timely feedback to junior web developers on their technical projects.
- Ensuring the quality of source code and conducting code and UI reviews.
- Proposing improvements to code organization to improve code quality and overall performance.

INDIE GAME & APP DEVELOPER, *Singapore*
Game developer, September, 2018 – February, 2020
- Sourced, developed, and published games on the Facebook Instant Games and Google Play platforms.
- Worked with Facebook Instant Games SDK and built synchronized leaderboards and bots which increased users retention and engagement.
- Built Unity3D source codes and exported them as Html5 (WebGL) games with a custom template to fit the instant games platform's requirements.

EDUCATION

MICROVERSE, June, 2021– January, 2022
Remote Full Stack Web Development Program, Full Time
- Spent 1300+ hours mastering algorithms, data structures, and full-stack development while simultaneously developing projects with Ruby, Rails, JavaScript, React, and Redux.
- Developed skills in remote pair-programming using GitHub, industry-standard git-flow, and daily standups to communicate and collaborate with international remote developers.

University of Mohammed I, September, 2016 – July, 2018
Bachelor's Degree, Computer science
- Graduated with distinction. Studied Computer sciences: IT networking, Algorithms, programming, web development, and mobile applications.

University of Mohammed I, September, 2014 – July, 2016
Diploma of general university studies, Mathematics and Computer Sciences
- Studied advanced Mathematics, Physics, Algorithms, and Sciences of software engineering.

SKILLS

Front-End: JavaScript, React, Redux, jQuery, HTML5, CSS3, Bootstrap, SASS

Back-End: Ruby, Rails, PostgreSQL

Tools & Methods: Git, GitHub, Heroku, Netlify, Mobile/Responsive Development, RSpec, TDD, Chrome Dev Tools, Mobile/Responsive Development

Professional: Remote Pair-Programming, Teamwork, Mentoring

PROJECTS

Budget-app
- An app where you can manage your budget: you have a list of transactions associated with a category so that you can see how much money you spent and on what.
- Built with: (Rails, Ruby, PostgreSQL, SASS)

Countries of all the world
- An app that shows a list of all countries in the globe, together with their associated information.
- Built with: ((JavaScript, React)

Cove student
- An android app that applies the "fuzzy logic" approach in the education field to help students choose their field of studies based on their subjects of interest and secondary school grades.
- Built with: (Java, Android studio)
